

CONFIDENTIAL

2 June 1970

MEMORANDUM FOR:

25X1A

SUBJECT : Survey of Remote Devices and Computers

1. Attached are two copies of the revised terminal questionnaire. This response covers the Directorate with particular emphasis on SIPS.

2. I have asked about single terminal to multiple computer (SANCA to RID) and Headquarters building to outside computer (O/C) requirements. No one has planned these kinds of capabilities. I hesitate to say these requirements will never emerge, but they do not appear to be just around the corner.

25X1A

3. Our previous questionnaire identified OC/SCD/MSB and OC/A as having either a real or potential terminal requirement. The OC/A requirement can be serviced by providing secure telephone service to Ames Building Data Management Center (DMC) from Magazine. The OC/SCD/MSB requirement can also be satisfied through the Ames DMC. These two entries have not been separately included in this current questionnaire.
